

# Height Restrictors

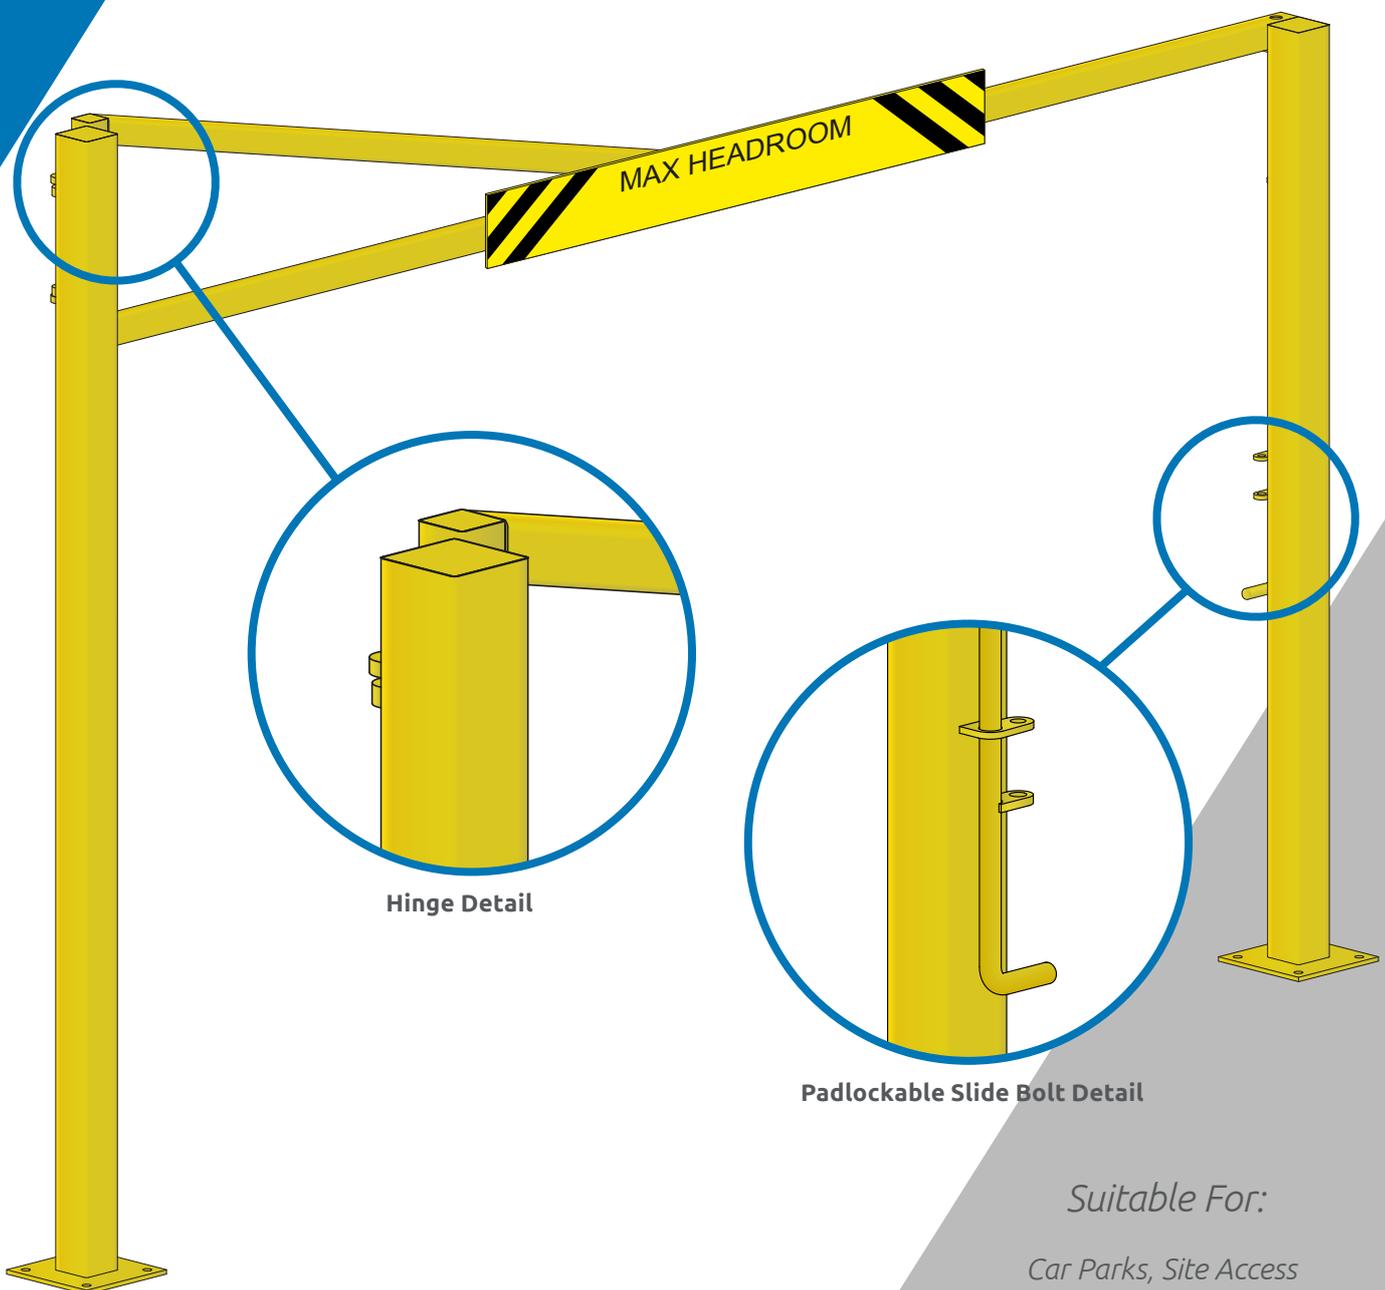

## Height Restrictors

Designed to prevent high sided or heavy goods vehicles from entering car parks or areas restricted to cars and light commercials.

- Horizontal arm can rotate open 90° in the desired direction to allow access if required. The handing and direction of swing – open in/out must be specified at time of order.
- Horizontal arm is secured shut by padlock (not supplied).
- An additional catch post can be supplied to enable locking in the open position.
- Headroom height can be clearly marked using our high visibility sign.

### *Product and Finish Standards*

- Barrier finish is galvanised as standard with the option of polyester powder coating to most RAL or BS references.

*Suitable For:*

*Car Parks, Site Access*
