

Protek 656 Clamp

Protek 656

Double Wire Panel System

All the benefits of the 656 Double Wire panel system, but with the addition of a clamp fixing the panel to the post for increased security around industrial, commercial, retail and sports areas. This is a flat panel using twin horizontal wires 6mm in diameter, welded to a 5mm vertical wire. The panel is fixed to the post with a 40 x 5mm clamp bar.

Product and Finish Standards

- Mesh panel wire manufactured to BS 4102 and galvanised to BS EN 10244-2:2001 class D, weld strength is 75% of the minimum tensile strength of the wire (tensile range 540-690 N/m²)
- Post material manufactured to BS EN 10210-2:1997 and galvanised to BS EN 10346:2009
- Panels & Posts are powder coated to BS EN 13438:2005 (min 100 micron)

Posts, Clamps and Fixings

The posts and full length clamp bars that Alexandra Security Limited offers provide a fixing system which secures the panels but allows for variations. The system is easy to install and allows the panels to be stepped, helping the fence line to follow the contours of the ground. With the vandal resistant security fixings this post and clamp system provides a higher level of security than the traditional clip system.
