

SiteGard™ Delivered Nationwide – Whatever the Specification

A best seller at Alexandra, SiteGard™ has been keeping construction sites safe and secure for many years. The nationwide coverage of our fleet of delivery trucks means that customers across the UK can take advantage of deliveries within 3 days from our standard range, benefiting from its versatile construction and ease of installation wherever they're working next.

But while many customers select from our standard, in-stock range, our workshops are constantly working to manufacture specialist versions of SiteGard™.

Slide and cantilever versions have been manufactured where large gates need to operate within a limited swing space, but this contractor wanted a bi-folding gate with additional pedestrian access. To match the overall appearance of the perimeter our gates could have been finished with a timber cladding, but site safety required good visibility both too and from the access road, so instead, mesh was fixed to the frame.

In addition to matching the required build specification we were able to deliver the customers new gates to the installers within 7 days of them approving their CAD drawings, reducing the risk of onsite theft and ensuring that work could continue according to schedule.
