

Protek 1000 in Hilly Haywards Heath

The quality products that Alexandra Security supply are only ever half the story, and it's down to the installers to complete the project and help fulfil the wants and needs of the end user.

Contractors and installers are therefore to be seen at their best when they have to overcome man-made and natural obstacles, and one of the most common issues is the installation of a line of fencing along a gradient.

The Protek 1000, selected for the steep Haywards Heath location of St Willfreds CE Primary School, allowed for a pleasing appearance that meant that the pupils are safe, and the local residents don't have a harsh perimeter barrier to look at.

Our fencing was supplied with a durable plastic clip that matched the powder coated mesh, posts and gates, but as more and more schools are looking to apply their own colours to their installations, metal clips can be substituted which can be powder coated to match.

Regardless of the issues, Alexandra will work with any specification to help come up with a solution for the installation, all of course supported with bespoke CAD drawings.
