

# Protek<sup>®</sup> 1000

## Single Wire V-Mesh Clip Fence System

The Protek 1000 mesh fence system provides a perimeter security fence that is aesthetically pleasing with high through-visibility, helping it to blend into its surroundings.

Protek 1000 features welded single-wire mesh panels with horizontal triangular folds that help to form a strong, rigid fence line. Adjoining panels are held together with metal clips that are then pinned into posts using pre-drilled holes. It is particularly suitable for use as a general purpose boundary fence for schools, public areas and retail parks.

## Applications

- Schools and Colleges
- Public Places & Buildings
- Retail Parks
- Business Parks

1. Hooked post cap
2. Extra holes for stepping
3. Triangular folds: 2, 3 or 4 per panel
4. M8 x 30 security screw & clip
5. 5mm horizontal wire / 4mm vertical wire

## DATASHEET

Version 1.3 | 08-23

### Posts, Clips and Fixings

The posts and clips that Alexandra Security offers provide a fixing system which secures the panels but allows for variations. The system is easy to install and allows the panels to be stepped, helping the fence line to follow the contours of the ground. With the vandal resistant security fixings this post and clip system provides a reasonable level of security to any boundary.

*Please note: Posts feature extra stepping holes to allow the fence line to be stepped on sloping ground. When not used, these holes do not require a security screw or clip.*
